

3.1 User :

Before customizing the travel app, first create a new user, Eric Executive, and set him up as manager. This involves assigning roles and profiles so that Eric has the correct permissions to approve travel requests.

The screenshot shows the Salesforce Setup interface. The left sidebar contains a search bar with 'user' and a list of navigation items: Users, Permission Set Groups, Permission Sets, Profiles, Public Groups, Queues, Roles, User Management Settings, and Feature Settings. The 'Users' item is selected. The main content area displays the 'User Edit' form for 'Sunny Gupta'. The form has tabs for 'General Information' and 'Advanced Information'. The 'General Information' tab is active, showing fields for First Name (Sunny), Last Name (Gupta), Alias (sgupt), Email (bhuvaneswarishanmugam20), Username (bhuvaneswaris2002@gmail), Nickname (User1698314626853529077), Title, Company, Department, and Division. On the right side of the form, there are dropdown menus for Role (<None Specified>), User License (XOrg Proxy User), and Profile (Cross Org Data Proxy User). Below these are checkboxes for Active (checked), Marketing User, Offline User, Knowledge User, Flow User, Service Cloud User, Site.com Contributor User, and Site.com Publisher User. The bottom of the screen shows the Windows taskbar with the search bar and system clock.
